Executive summary

Key figures and findings · data as of 30/10/2026

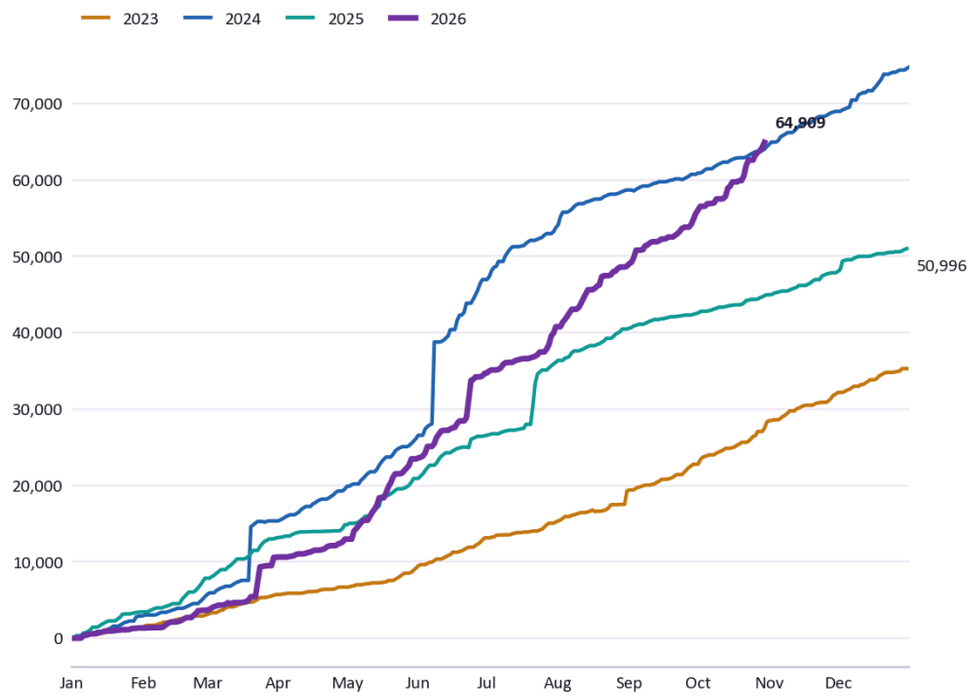

2026 YTD net buybacks	Last 12M net buybacks	LTM buyback yield	Issuers buying YTD	Top-5 share (LTM)	Remaining buyback funds
64,909	**71,055**	**0.69%**	**51**	**76%**	**191,685**
+45% vs 2025 YTD	MXN million		53 vs 2025 YTD		1.9% of market value

Key findings

- Net buybacks in 2026 YTD total MXN 64,909 million, +45% vs. the same period of 2025 (MXN 44,851 million); at this pace the year would close near MXN 78,191 million (vs MXN 50,996 million in 2025).
- By sector, Retail (31% of the total) and Metals And Mining (27%) lead this year's buybacks.
- Over the last 12 months, 51 issuers were net buyers and 9 net sellers. The top 5 account for 76% of the amount (GMEXICO alone, 25%); concentration is equivalent to 7 equal-sized issuers.
- In October 2026 net buybacks were MXN 9,330 million, above the 12-month monthly average (MXN 5,912 million; +1.0 standard deviations). Issuers buying in the month: 30 (12M average: 34).
- Accelerating (3M vs 12M monthly average): GMEXICO, AMX, WALMEX, BIMBO.
- Regular buyers with no purchases in 45+ days: BOLSA, GISSA, TRAXION, CULTIBA.
- Remaining buyback funds total MXN 191,685 million (1.85% of the market value of issuers with prices).

Intensity = days with purchases / trading days. Buy price in 52-week range: 0% = bought at the low, 100% = at the high. Months of fund* = remaining fund / average monthly purchases of the last 3 months. Close vs avg. buy = gain/loss on the shares repurchased at the current price. Remaining fund: last filing in the past 12 months.

Methodology & Disclosures

• Source: public buyback filings ("Información de recompra") published by Bolsa Mexicana de Valores for every issuer, collected automatically each business day. Closing prices: Yahoo Finance.

• Net buybacks = amount bought − amount sold by each issuer's buyback fund, in MXN, by trade date.

• Buyback yield = net shares bought back / outstanding shares reported in the issuer's latest filing. Sector yield = sector net buybacks / sector market value (outstanding shares × close at the cut-off date).

• Sector classification: data/sectores.csv (editable). Periods that start before the full-market data coverage are shown as n.d. rather than as partial figures.

• Includes REIT (FIBRA) CBFI buybacks, which the exchange publishes under a separate filing type.

• Corrections: when an issuer files again for the same trade date starting from the same remaining-fund balance (broker change, typing error, resend), the later filing replaces the earlier one; operations re-filed with the same folio and zero shares are treated as cancellations. Former tickers are merged into the current one (e.g. ALFA → SIGMAF).

• Momentum compares the average monthly net amount of the last 3 complete months with the last 12. Concentration uses the Herfindahl-Hirschman index over net buyers.

Data quality

Filings processed	**25,253**
Filings superseded by a later correction	**201**
REIT (FIBRA) filings	**2,072**
Issuers with activity	**90**
Full-market coverage from	**30/12/2021**
Last trade date	**30/10/2026**

Disclosures

This document is for informational purposes only and does not constitute an offer, recommendation or solicitation to buy or sell any security. Figures are compiled from public filings and third-party prices that may contain errors or omissions; no guarantee is given as to their accuracy or completeness.
