Resumen ejecutivo

Cifras clave y hallazgos · datos al 05/11/2026

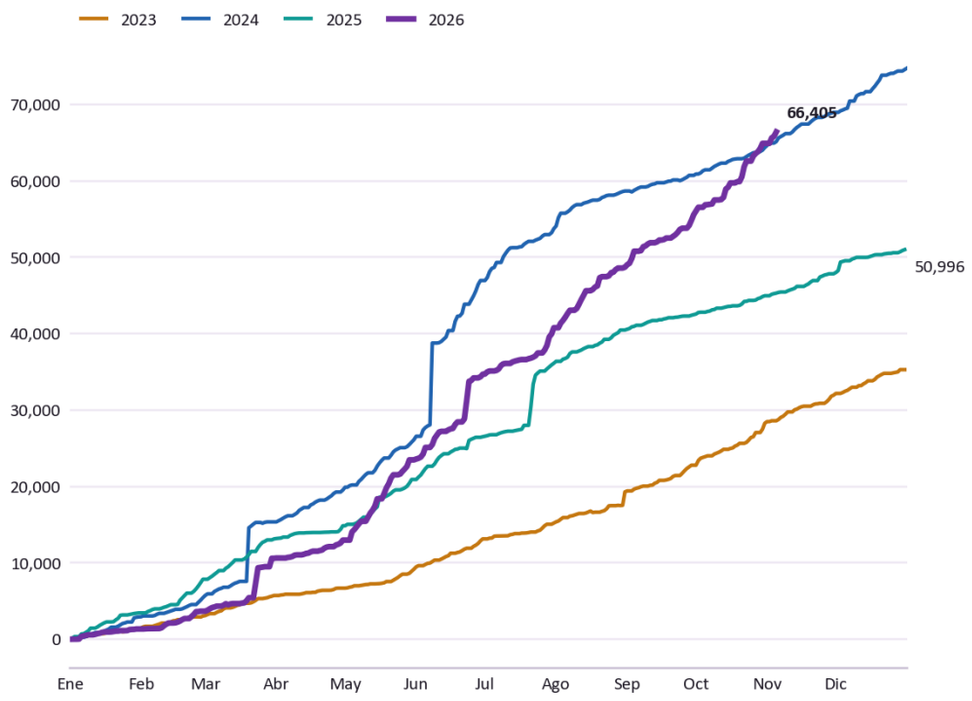

Recompra neta 2026 YTD	Recompra neta 12M	Buyback yield 12M	Emisoras comprando YTD	Peso top 5 (12M)	Fondos de recompra remanentes
66,405	**72,095**	**0.68%**	**51**	**76%**	**189,702**
+47% vs 2025 YTD	millones de pesos		53 vs 2025 YTD		1.8% del valor de mercado

Hallazgos principales

- La recompra neta acumulada en 2026 suma $66,405 millones, +47% contra el mismo periodo de 2025 ($45,306 millones); a este ritmo el año cerraría cerca de $78,439 millones (vs $50,996 millones en 2025).
- Por sector, Retail (31% del total) y Metals And Mining (28%) concentran la recompra del año.
- En los últimos 12 meses, 50 emisoras fueron compradoras netas y 9 vendedoras netas. Las 5 mayores explican el 76% del monto (GMEXICO sola, 26%); la concentración equivale a 7 emisoras de igual tamaño.
- En octubre 2026 la recompra neta fue de $9,330 millones, por encima del promedio mensual de 12 meses ($5,912 millones; +1.0 desviaciones estándar). Emisoras compradoras en el mes: 30 (promedio 12M: 34).
- Aceleran su ritmo (promedio 3M vs 12M): GMEXICO, AMX, WALMEX, BIMBO.
- Recompradores habituales sin compras en 45+ días: BOLSA, GISSA, TRAXION, CULTIBA.
- Los fondos de recompra aún disponibles suman $189,702 millones (1.79% del valor de mercado de las emisoras con precio).

Intensidad = días con compra / días hábiles. Compra en rango de 52 semanas: 0% = compró en el mínimo, 100% = en el máximo. Meses de fondo* = fondo remanente / compras mensuales promedio de los últimos 3 meses. Cierre vs prom. compra = ganancia/pérdida de las acciones recompradas al precio actual. Fondo remanente: último aviso de los últimos 12 meses.

Metodología y aviso legal

• Fuente: avisos públicos de recompra ("Información de recompra") que publica la Bolsa Mexicana de Valores para cada emisora, recolectados automáticamente cada día hábil. Precios de cierre: Yahoo Finance.

• Recompra neta = importe comprado − importe vendido por el fondo de recompra de cada emisora, en pesos, por fecha de operación.

• Buyback yield = acciones netas recompradas / acciones en circulación del último aviso de la emisora. Yield sectorial = recompra neta del sector / valor de mercado del sector (circulación × cierre a la fecha de corte).

• Clasificación sectorial: data/sectores.csv (editable). Los periodos que inician antes de la cobertura de todo el mercado aparecen como n.d. en lugar de cifras parciales.

• Incluye las recompras de CBFIs de FIBRAs, que la Bolsa publica como un tipo de aviso distinto.

• Correcciones: cuando una emisora vuelve a publicar para la misma fecha de operación partiendo del mismo remanente (cambio de casa de bolsa, error de captura, reenvío), el aviso posterior sustituye al anterior; las operaciones republicadas con el mismo folio y 0 acciones se tratan como cancelaciones. Las claves anteriores se unen a la vigente (p. ej. ALFA → SIGMAF).

• El momentum compara el monto neto mensual promedio de los últimos 3 meses completos contra el de 12 meses. La concentración usa el índice Herfindahl-Hirschman sobre las compradoras netas.

Calidad de datos

Avisos procesados	**25,253**
Avisos sustituidos por una corrección posterior	**201**
Avisos de FIBRAs	**2,072**
Emisoras con actividad	**90**
Cobertura de todo el mercado desde	**30/12/2021**
Última operación	**05/11/2026**

Aviso legal

Este documento tiene fines exclusivamente informativos y no constituye una oferta, recomendación ni solicitud de compra o venta de valores. Las cifras se integran de avisos públicos y precios de terceros que pueden contener errores u omisiones; no se garantiza su exactitud ni su integridad.

Texto genérico. Coloque el aviso legal oficial de la casa de bolsa en assets/aviso_legal.txt antes de distribuir este documento.
